

## OVERVIEW

For more than 30 years, Digital Designs has been a leader in Document Management, Accounts Payable Automation and Electronic Payment solutions that streamline traditional paper-intensive business processes.

## ROI

The accounting team at Digital Designs was able to eliminate manual data entry and free up valuable time in the workday.

## Benefits

- Freed up valuable time, no more manual data entry
- Simplified accounting process
- Accuracy between Salesforce and QuickBooks
- Increased productivity

## CHALLENGE

The accounting team at Digital Designs knew they needed a better way to integrate Salesforce and QuickBooks. Since they invoice straight out of Salesforce, they need their customers and opportunities to be synced with QuickBooks. Manual data entry was taking too much time and wasting hours every day. They tried a few other solutions, but they never worked without a lot of issues.

## SOLUTION

Syncing 100 or more invoices per month between Salesforce and QuickBooks is now an effortless and seamless process with Autofy. For the past 5 years, Digital Designs has been using Autofy with very few issues. When an issue does arise, customer support at Autofy resolves any issues quickly.

*“We’ve been using this software for 5 years and the support has been spot-on and steadfast. You can tell the customers are important to them.”*

—Terrie Bolick, Accounting Manager  
Digital Designs, Inc.
